DO YOU WONDER IF YOUR MEMORY IS NORMAL FOR YOUR AGE?

HAVE YOU MISSED AN APPOINTMENT?

DO YOU HUNT FOR YOUR KEYS?

DO YOU WORRY THAT YOUR MEMORY IS DECLINING?

Emory ADRC'S Free Memory Screening Day Thursday, October 18, 2012

So many people over the age of 60 report these concerns to us that the Emory Alzheimer's Disease Research Center decided to create a **free memory screening program for the community.**

While a memory screening is not a memory evaluation, it is a helpful test. You will be given a series of questions and tasks designed to screen for memory, language skills and thinking abilities. The results will be given to you at the end of the screening. If the screening reveals memory concerns, testing results will be given to you and next steps will be discussed.

Early evaluation of minor memory problems is important. Individuals with mild cognitive impairment or Alzheimer's disease benefit from early diagnosis and treatment. Other memory problems such as those caused by vitamin deficiencies or thyroid problems can be readily treated. To schedule a memory screening appointment for you or a friend on October 18, 2012, please contact us at [404-778-7777](tel:404-778-7777).

When: Thursday, October 18, 2012
By Appointment-Call 404-778-7777
